Hip Tunnel Stone

Effect Fire

There is no effect fire as realistic as the new **THE FLAME** fire! All you need is electricity, "Bio-Fluid" (distilled water) and special lamps and an ultrasonic vaporizer to make this magic play of flames, so incredibly authentic. The intensity of the flames is adjustable and thanks to the remote control it is very comfortably to operate. A ultra-fine water mist streams out and improves the quality of the air and creates a warm and cosy atmosphere. The burning time with one tank filling (manual filling) is approx. 6-8 hours.

EFFECT FIRE HIP 50

Hip 50 Front Stone-Wood

Hip 50 Tunnel Steel

Advantages

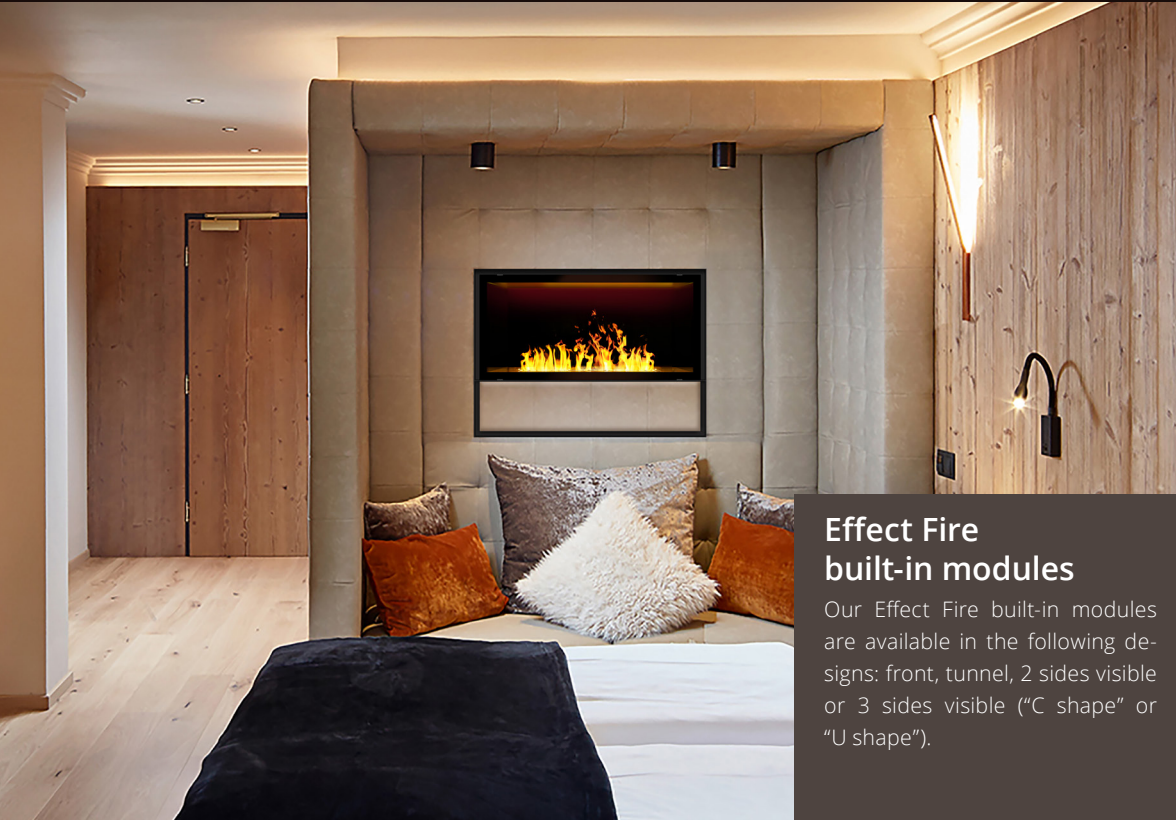

- very realistic flames - but no fire risk
- runs on distilled water
- childproof
- no risk against hot surfaces
- no chimney required
- creates a healthy indoor climate
- plug and play
- Endless Effect Fire by modular system
- adjustable flames
- including remote control
- automatic filter & filling system
- CE-approved

Very easy to install.
E.g. Niche with 230V connection.

ELECTRIC EFFECT FIRE

Manual filling

Preparation (on site):

- **A** flexible power cable with current line plug and power connection 230 V

Connection to the power supply

Manual filling:

- open the control drawer, pull out the drawer
- lift up the water tank, fill it with “Bio-Fluid”
- reinsert the water tank - push the drawer in

Fully automatic filling:

Preparation (on site):

- **B** osmosis water pipe from the “O-Box” (drawn in the empty pipe)
- **C** power and control cable (5 x 1,5 mm², drawn in empty conduit)

Connection:

- connection to the power and control line
- connection to osmosis water pipe

Fluidmatic

The **automatic filter and filling system “Fluidmatic”** for effect burners is providing comfort and safety. The permanently connected filter and reverse osmosis system - **O-Box** - is the optional “fuel sources” for electric effect fire appliances, including pump, timer and various filters.

O-Box - preparation (on site):

- supply fresh water
- waste water
- power connection 230 V

The power control cable and the osmosis line (Bio-Fluid line) of the Endless Fire Box are connected to the O-Box.

The **O-BOX-READY** pictogram identifies all built-in modules that are prepared for fully automatic filling!

INNOVATION LOW & SPHERE

Low

Sphere

The new "Low" model fits perfectly into the room structure and offers a beautiful, romantic campfire ambience.

Due to the LED ambient lighting, the noble fire table „LOW“ appears to float above the ground as a stone, steel or wood disc. The glazed fire basket with revolving door "guards" the fire and lets its flames shine with even more contrast.

Also available as gas fire and ethanol fire.

Available in different diameters, square or rectangular. standard: 150, 175 or 200 cm.

"Sphere" - the latest creation from **THE FLAME**. The fireball is attached to the ceiling and thus floats in the room, just above the ground, several in a high lobby, above the pool in the suite ... wherever - an eyecatcher of luxury, coolness and innovation. With many different color options the "Sphere" becomes a high-light in every ambience.

Available in many colors and surfaces. Standard: gold matt, ø100 cm, firebox approx. ø65cm

SPARKLING CRYSTAL

Sit Gold with Sparkling Crystal

Hip Front with Sparkling Crystal - back wall

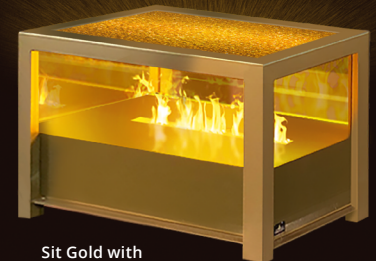

Bar 200 Gold

Sparkling crystal fire - The new exclusive line “**Sparkling Crystal**” with its combination of electrical effect fire and incredibly sparkling crystals, appear almost alive in the romantic light of the flames and will give you a goosepumping thrill. Not only the geographical proximity to the crystal market leader “**SWAROVSKI**” gave rise to the idea of adding an additional glamorous touch to our beautiful fire places. Let yourself be enchanted by the interplay between fire and sparkling crystals. All our “**SPARKLING CRYSTAL**” models are coming with a “**SWAROVSKI Crystal Pen**” as a gift.

GAS FIREPLACE | INSERTS BURNERS | TORCHES

OPEN OR CLOSED GAS FIREPLACES

Open gas fireplace

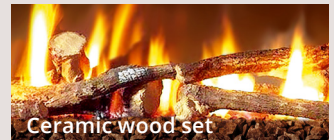

Closed gas
fire-place with
air exhaust system

Open gas fireplaces offer a romantic, open-fire experience. It is possible to satisfy every individual desire. The combustion is regulated by the air in the room or by means of a fresh air conduit. Gases are discharged through a chimney, moisture-resistant if possible.

Closed gas fireplaces offer a safe fire experience, coupled with the best heating solution through openings for the hot air (convection). The supply and exhaust system (concentric fireplace) provides a single conduit for exhaust and combustion air thanks to the double-wall structure. In this way it works independently of the air present in the room. With our set of decorative ceramic “wood”, decorative stones and Superglow with an incandescent effect, you can create an incomparable image around your fireplace.

Firebox

Our optional ceramic wood sets, decorative stones and Superglow are offering an incomparable fire ambiance.

Balanced Flue System

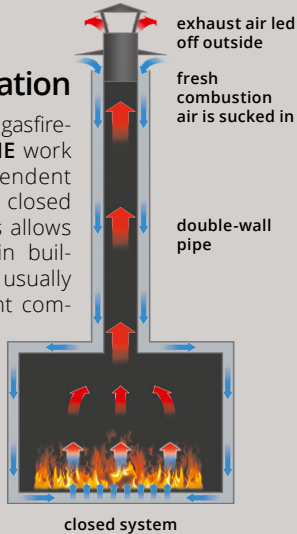

The balanced flue system by **THE FLAME** is a concentric stainless steel chimney with two parallel passageways. The inner pipe works as an exhaust pipe for smoke/gas and in the annular gap between inner and outer pipe the fresh combustion air is simultaneously sucked in.

Mode of operation

With this system the gasfireplaces of **THE FLAME** work completely independent from room air as a closed system in itself. This allows for its installment in buildings, which would usually not provide sufficient combustion air due to their airtight construction.

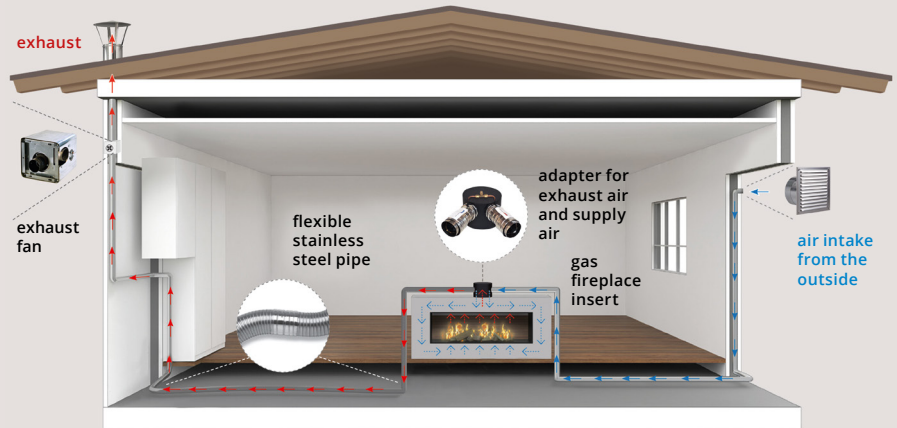

THE FLAME - State of the Art.

Fan-assisted exhaust system - Fan-Flex-Flue

Fan-assisted exhaust system for flexible installation of the exhaust and combustion air pipe. The pipes can be routed flexibly, in the floor, on ceilings, on walls, etc. even downwards for about 160 cm. An exhaust

fan supported by various (flow switch, speed control, etc.) guarantees the optimum flue draft and secure removal of exhaust gases. The Fan must be installed with a minimum distance of 5 m from the fireplace.

Unique, individual controls

- remote control
- wall switch
- timer
- clock timer
- motion sensor
- dimmer switch
- iBus and much more
- **THE FLAME** Gas-App

THE FLAME Gas-App
Optional for control of all gas appliances.

SMART HOME SYSTEM | PREMIUM SAFETY SYSTEM

Smart Home System

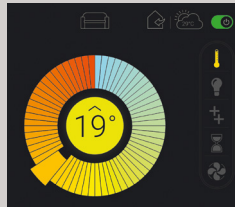

Control via a “**Smart Home System**” is now the most popular way of operating our fire furnitures. The integration takes place via an interface in the receiver (gas fire) or directly as an impulse to the device (effect fire).

We gladly give tips on programming, cable routing or actors to you. Thus, fully automated individual control is now a reality.

Program mode

Each of 8 programs can be set to go ON and OFF at specific times at set temperatures.

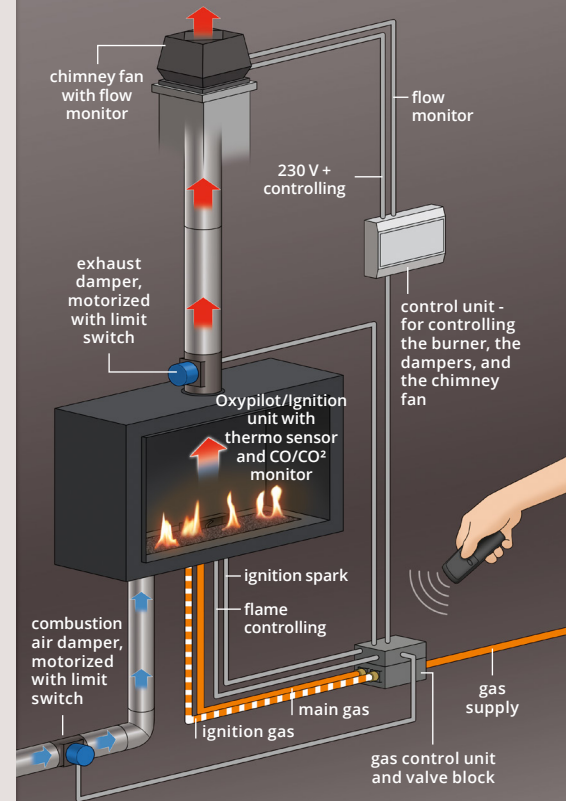

Thermostatic Mode

The room temperature is measured and then compared to the set temperature.

Premium Safety System Process

1. Starting of system through manual remote control, wall switch, or external signal (timer, twilight switch, motion sensor, i-bus, etc.).
2. Automatic opening of combustion air and exhaust air damper until limit switch contact is triggered (control unit).
3. Subsequent start of the chimney fan until flow monitor registers the outward air flow and removal of the exhaust gases is therefore ensured (control unit).
4. Subsequent ignition of pilot gas light in the gas burner by electric spark and measurement of continuous flame and combustion air quality (Oxypilot).
5. Subsequent start of the gas burner by through automatic opening of the main gas supply to the burner (Oxypilot).

Make your dream home a reality today!

With **THE FLAME** you can create rooms for relaxation and wellbeing. An open fire, blazing flames and a pleasant room climate are very inviting for resting and leisure. Fire furniture from **THE FLAME** does not require the insertion of a flue, and it is appropriate for all living areas. You can set it up easily, fill it with fuel, light it and enjoy the glorious fire. "**BIO-FUEL Indoor**" (fluid alcohol-based fuel) is produced from renewable raw materials, it is food-safe, it produces no smoke when it burns and it leaves no residue at hot air (1.5-2.9 kW). It saves that tiresome need to chop wood, with no dangerous sparks, soot or ash.

Premium conversion kit

THE FLAME ... wherever you want it!

THE FLAME offers a number of high-value decor fire furniture and is something of a perfect eye-catcher. Use **THE FLAME** wherever you want (living room, kitchen, terrace, garden, reception area, lobby, restaurant, suite, wellness area, ...)! To ensure an optimal use of **THE FLAME** products in a public area, we are ready to provide you with individual documentation appropriate to your boiler room depending on the details of the size of the room and the air exchange that you submit to us.

Filling - Ignition - Regulation

1. Bottling

THE FLAME products have a tap which allows for the safe bottling (stopping) of combustion fuel.

2. Filling

You receive a filling container whose designated capacity is that of the given boiler, to prevent any overflow.

3. Ignition

You receive an ignition and regulation key, so that you will in no way "burn your fingers".

4. Regulation

All "Free-Flame Burners" and band burners can be regulated!

Always be safe ... with THE FLAME!

Stability

All **THE FLAME** fire products are tested for stability! No systems or devices are located on rollers and torches are reinforced or equipped with a sway or splash guard.

Ventilation

The bottom-up ventilation of all fire areas / systems doesn't just offer only an optimal complete combustion and with it a fine high flame; it is also the best security measure in the event of any misuse by the user. With the reduction of hot steam above, risk of injury is almost eradicated

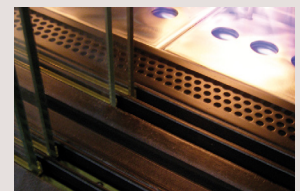

Contact protection glass:

Contact protection glass profiles for all models prevent direct access to hot components by small children (as well as "big children"!).

Double glazing

Ventilated double glazing with built-in appliances eradicate the risk of burning on hot glass surfaces (optional).
