THE FLAME Cord

NO STRINGS ATTACHED

This beautiful gas lantern was developed to match the latest garden furniture trends. The THE FLAME Cord is made of aluminium with braided Cord. The Cord is suitable for outdoor use: it's colourfast and mould resistant. The freestanding lantern has a diameter of 45 cm and is no less than 74 cm high. In terms of appearance, the THE FLAME Cord is somewhere between a gas lantern and a fire column. The freestanding lantern is available in greige and black and is guaranteed to be a mood maker in your indoor or outdoor area.

NOBLE THE FLAME

NOBLE STANDS FOR LUXURY

The THEFLAMENoble is a luxurious gas lantern with a ribbed black body. This gas lantern is supplied with a glossy shaded glass. A perfect choice if you're looking for something extra for your indoor or outdoor area. When lit, the THE FLAME Noble creates a subtle flame to enjoy cosy moments. The lantern is 30 cm high, has a diameter of 21 cm and is available in black.

EYE-CATCHER

Looking for a gas lantern sheathed in natural materials? Our Lantern Wood might be a great option for you. The casing of this lantern is made of wood, so it will boost your garden or interior with a natural look. Do you prefer the Lantern Wood round or square?

CONCRETE SQUARE & ROUND

The THE FLAME Concrete round is a robust gas lantern. The glass partly covers the concrete, giving the lantern a modern look. The square version, the THE FLAME Concrete square, will match a sleek, industrial interior or outdoor area perfectly thanks to its angular design.

A gas lantern from the THE FLAME Concrete line is what we would call a collector's item. The use of concrete-like materials in combination with glass makes these lanterns robust as well as atmospheric. The Concrete is available in two models: THE FLAME Concrete square and THE FLAME Concrete round.
